CONTENTS

FARMERS' BULLETIN NO. 1326.—CONTROL OF THE CODLING MOTH IN THE PACIFIC NORTHWEST: Page

Losses due to the codling moth 1
Nature of injury 1
Distribution and food plants 1
Appearance and habits of the codling moth 2
Seasonal history 5
Natural checks on codling-moth increase 7
Impractical measures for control 8
Methods of control which supplement the use of sprays 8
Spraying the main reliance for control 10
Equipment for spraying 11
Spray materials 13
How to spray 17
When to spray apples 19
When to spray pears 23
Concise directions for spraying 24
Combination spraying for the codling moth, powdery mildew, and scab 24
Combined spray schedules for the codling moth, powdery mildew, and scab 25

FARMERS' BULLETIN NO. 1327.—CANARIES: THEIR CARE AND MANAGEMENT:

Introduction 1
History 2
Varieties 3
Cages 5
Care of cages 7
Indoor and outdoor aviaries 8
Food 9
Bathing 10
Molt 11
Color feeding 12
Breeding 13
Sex and age 15
Vermin 16
Care of feet and bill 17
Diseases and injuries 17
Broken limbs 18
Loss of feathers about head 18
Respiratory troubles 19
Intestinal complaints 19
Bibliography 20

FARMERS' BULLETIN NO. 1328.—PRODUCTION OF SEED FLAX:

Introduction 1
History 1
The flax-growing area 3
Uses of flaxseed 4
Flaxseed markets 4
Varieties of seed flax 4
Value of good seed 5
Diseases of flax 6
Wilt 6
Rust 7
Heat Canker 7
Pasmo 7

FARMERS' BULLETIN No. 1328.—PRODUCTION OF SEED FLAX—Continued. Page
Rotations for flax 7
Flax under irrigation 8
Flax and wheat as a mixed crop 9
Disadvantages of the mixed crop 10
Growing seed flax 11
Preparing the seed bed 11
Method of seeding 12
Control of weeds 12
Time of seeding 12
Rate of seeding 13
Harvesting the crop 14
Recleaning the seed 15
Storing the seed 16
FARMERS' BULLETIN No. 1329.—THE BOLL WEEVIL PROBLEM:
Origin, spread, and present distribution of the boll weevil 1
Damage 2
Prospects in newly invaded territory 4
Work upon which this bulletin is based 5
Description and life history of the boll weevil 5
Hibernation 8
How nature assists in destroying the boll weevil 10
Effects of heat 10
Insect parasites 11
Other insect enemies 11
Other factors in natural control 11
Variation in natural control 12
Dissemination 12
Methods of control 13
Direct control by poisoning with calcium arsenate 14
Indirect means of control 17
Ineffective methods of control 24
Effect of methods of control of the boll weevil on the control of other insects 27
Summary of control measures 29
FARMERS' BULLETIN No. 1330.—PARASITES AND PARASITIC DISEASES OF SHEEP:
Susceptibility of sheep to parasitic diseases 3
Important preventive measures 4
External parasites 5
Lice 5
The sheep tick 8
Sheep-scab mite 10
Other external parasites 13
Internal parasites 16
Arthropods 17
Grub in the head 17
Tapeworms 20
The moniezias 20
The fringed tapeworm 22
Bladderworms 24
The thin-necked bladderworm 24
Sheep measles 26
The gid parasite 27
The hydatid 31
Flukes 33
The common liver fluke 33
The large liver fluke 36
Roundworms 37
The stomach worm 38
The nodular worm 42
The sheep hookworm 45
The thread-necked strongyles 47
The whipworm 48
The thread lungworm 50
The hair lungworm 51
Other internal parasites 53

FARMERS' BULLETIN NO. 1331.—BACK-YARD POULTRY KEEPING: Page
Advantages of home poultry 1
Overcoming objections to keeping poultry in the city 2
Kind of fowls to keep 2
Size of flock 3
Procuring stock 3
Housing 4
The yard 11
Feeding 12
Lice and mites 16
Hatching and raising chicks 17
Culling the hens 18
Preserving eggs 18
Practical pointers 21
Publications relating to poultry raising and egg production 22
FARMERS' BULLETIN NO. 1332.—SEED POTATOES AND HOW TO PRODUCE THEM:
Yields of potatoes 1
What constitutes good seed 5
Pure seed 5
Uniformity in size and shape of tubers 6
Development of high-grade seed potatoes 6
Securing a good strain of seed 6
Seed-potato improvement by selection 6
Improvement practices 7
Relative merits of the preceding practices 10
Requirements for success 10
Seed treatment 11
Preparation and fertilization of the soil 12
Careful cultural practices 12
Elimination of varietal mixtures and diseased or weak plants 12
Monetary value of good seed potatoes 13
Importance of tuber shape 13
Careful harvesting and storage of the crop 14
Large compared with small seed tubers 14
Whole compared with cut seed 16
Summary 16
FARMERS' BULLETIN NO. 1333.—PRUNING CITRUS TREES IN THE SOUTHWEST:
Introduction 1
Objects of pruning 2
Methods of pruning 2
Heading young trees 2
Arrangement of the main branches 3
Care of the early fruit-bearing growth 5
Pruning full-bearing orange and grapefruit trees 7
Pruning full-bearing lemon trees 8
Renewal of old neglected and decadent trees 10
Pruning frost-injured trees 12
Pruning diseased and injured trees 15
Seasons for pruning 16
Pruning methods and pruning tools 18
Pruning implements 19
Pruning cuts and their treatment 21
Care of pruned trees 25
Individual tree care 26
Frequency of pruning 27
Disposal of prunings 28
Cost of pruning 28
Effects of pruning 29
Effect of pruning upon tree growth 29
Effect of pruning upon the growth of fruits 29
Effect of pruning upon fruit production 30
Summary 30
FARMERS' BULLETIN NO. 1334.—HOME TANNING OF LEATHER AND SMALL FUR SKINS:
Having hides tanned 1
Buying leather by the side 2

FARMERS' BULLETIN No. 1334.—HOME TANNING OF LEATHER AND SMALL FUR SKINS—Continued. Page

Home tanning 3
Tanning hides and skins for leather 4
Preliminary operations 5
Bark-tanned sole and harness leather 12
Chrome-tanned leather 15
Alum-tanned lace leather 20
Tanning fur skins 22
Publications relating to fur animals 28

FARMERS' BULLETIN No. 1335.—CONTROLLING THE GIPSY MOTH AND THE BROWN-TAIL MOTH:

Introduction and spread 1
The gipsy moth 6
Life history 6
Means by which the gipsy moth is spread 7
Food plants 8
Injury caused by the gipsy moth 8
Effect of climatic conditions on the gipsy moth 10
Native enemies 10
Introduced parasites and enemies 11
The brown-tail moth 11
Life history 11
Food plants 13
Injury caused by the brown-tail moth 13
Native enemies 14
Introduced parasites and enemies 14
Methods of controlling the gipsy moth 15
General methods 15
Methods to be used in orchards 20
Methods advisable in cities and towns 21
Controlling the gipsy moth in woodland 21
Methods of controlling the brown-tail moth 23
Controlling the brown-tail moth in woodland 24
Organization and status of work against the gipsy moth and the brown-tail moth 25
State work 25
Work of the Bureau of Entomology 26
Cooperative work 27

FARMERS' BULLETIN No. 1336.—FEEDING AND MANAGEMENT OF DAIRY CALVES AND YOUNG DAIRY STOCK:

Feeding and management of the dairy calf 1
Feeding before birth 1
Separation from the cow 1
Teaching the calf to drink 2
Cleanliness the first essential 2
Pasteurization of milk 3
Quantity and quality of milk 3
Frequency and regularity of feeding 4
Feeding during the first five weeks 5
Roughage for calves 6
Grain for calves 7
Milk substitutes 8
Quarters for calves 10
Stanchions for calves 11
Prevention of horns 11
Water and salt 13
Marking calves for identification 13
Calf diseases 15
Scours from indigestion 15
White scours 16
Feeding and management of young dairy stock 16
Feeding from 6 months to 1 year of age 16
Feeding from 1 to 2 years of age 17
Age to breed 18
Handling young heifers 18
Fall calving advisable 18
The young bull 18

FARMERS' BULLETIN NO. 1337.—DISEASES OF POULTRY: Page

Susceptibility to disease 1
How to prevent disease 2
How to control disease 2
Disinfectants and their application 2
Simple catarrh (colds) 3
Contagious catarrh (roup) 3
Chicken pox (diphtheria) 5
White diarrhea of chicks 9
Bacterium pullorum infection of fowls and chicks 10
Coccidiosis 12
Aspergillosis (brooder pneumonia) 13
Cholera 14
Choleralike diseases 15
Fowl typhoid 16
Tuberculosis 16
Enterohepatitis (blackhead) 18
Gout 20
Tumors 21
Rose-chafer poisoning 21
Leg weakness 22
Lameness in geese and ducks 22
Wing lameness in pigeons 23
Bumblefoot 23
Egg-bound 23
Vent gleet 24
Feather pulling 24
Toe picking 25
Impacted crop (crop-bound) 25
Inflammation of the stomach or intestines 25
Limberneck 26
Diarrhea 26
Favus (white comb) 26
Gapes 27
Intestinal worms 30
Roundworms 31
Tapeworms 32
Lice 34
Mites 35
Common red mite 35
Depluming scabies 36
Scaly leg; mange of the leg 36
Other mites 38
Chiggers or harvest mites 38
Ticks 38
Fleas 39

FARMERS' BULLETIN NO. 1338.—TOMATOES AS A TRUCK CROP:

Introduction 1
Soils adapted for growing tomatoes 2
Crop rotation 3
Varieties of tomatoes for the market 4
Sources of tomato seed 4
Methods of starting early tomato plants 5
Hotbeds and coldframes 6
Growing tomato plants 9
Preparation of land 12
Manures and fertilizers 13
Planting in the field 15
Cultivation 18
Irrigation 19
Staking and pruning 19
Insects and diseases 22
Gathering and preparing the crop for market 27
Summary 32

	Page
FARMERS' BULLETIN No. 1339.—RED CLOVER CULTURE:	
Introduction	1
History and present distribution of red clover	2
Description of the red-clover plant	2
Where red clover thrives	3
Requirements for obtaining a stand of red clover	4
Handling the red-clover crop	11
Red clover as feed	14
Red clover in mixtures	15
Red clover and soil improvement	17
Red clover in rotations	18
Red-clover seed production	19
Varieties of red clover	23
Enemies of red clover	24
Clover sickness and clover failure	30
FARMERS' BULLETIN No. 1340.—POLISH AND POULARD WHEATS:	
Introduction	1
Polish wheat	1
Description	1
History	2
Adaptation	3
Poulard wheat	3
Description	4
History	4
Adaptation	4
Varieties	6
FARMERS' BULLETIN No. 1341.—MULE PRODUCTION:	
Distribution of mules in the United States	1
Advantages of the mule as a work animal	2
Some peculiarities of the mule	2
Production of mules	4
Selecting the jack	4
Care of the jack	5
Feeds for the jack	6
The brood mare	6
Breeding the mare	8
Care of the pregnant mare	9
Care of mare at foaling time	10
Care of mare and foal	10
Weaning the colt	11
The orphan colt	12
Spring or fall colts	13
Educating the colt	13
Feeding and care of mules	13
Judging mules	14
Market classes of mules	17
Draft mules	19
Farm mules	19
Sugar mules	27
Cotton mules	27
Mining mules	27
FARMERS' BULLETIN No. 1342.—DAIRY-BARN CONSTRUCTION:	
The type of barn to select	1
The building site	1
Essential features in dairy-barn construction	2
Light	3
Air space	4
Ventilating system	4
Cow stalls	8
Stanchions	11
Stable floor	12
Stable equipment	14
Water supply	14
Types of dairy barns	15
The one-story cow stable	15
The two-story dairy barn	18
Blue prints of dairy buildings	20
Considerations on cost of construction	22

FARMERS' BULLETIN NO. 1343.—CULTURE OF CITRUS FRUITS IN THE GULF STATES: Page

Scope of the work 1
History of the Florida citrus industry 1
History of the citrus industry in the other Gulf States 3
Selection of a locality and site for a grove 5
Kinds of citrus fruits for the Gulf States 8
Varieties of citrus fruits for the Gulf States 11
Propagation of citrus trees 16
Grove management 19
Harvesting and marketing citrus fruits 37
Cost and profits in citrus growing 38
Publications on citrus fruits 40

FARMERS' BULLETIN NO. 1344.—THE STRAWBERRY ROOTWORM AS AN ENEMY OF THE GREENHOUSE ROSE:

A new enemy of rose 1
Character of injury 1
Economic importance 3
Development and habits 4
The egg 4
The larva or grub 4
The pupa or resting stage 6
The beetle or adult 6
Seasonal history 7
How to control the pest 7
Hydrocyanic-acid gas fumigation 8
Scraping soil of beds 10
Spraying with arsenicals 10
Treating with kerosene nicotine oleate 10
Dusting with arsenicals 11
Treating with tobacco dust and wood ashes 12
Clean culture and hand picking 12
Control program 13
Preventive measures 14

FARMERS' BULLETIN NO. 1345.—ROOT KNOT: ITS CAUSE AND CONTROL:

Introduction 1
Appearance of plants attacked by root knot 2
Cause of root knot 5
Plants attacked by root knot 7
Plants not attacked 10
Conditions favoring root knot 10
Methods by which the parasite is spread 12
Methods of controlling root knot 14
Prevention of soil infestation easier and cheaper than cure 23
Selecting resistant varieties 24
Summary 25

FARMERS' BULLETIN NO. 1346.—CARPET BEETLES AND THEIR CONTROL:

Carpet beetles or "buffalo moths" 1
The common carpet beetle 1
The black carpet beetle 4
The varied carpet beetle 6
The furniture carpet beetle 7
Control measures 9
Naphthalene 10
Paradichlorobenzene 10
Camphor 10
Red-cedar chests 11
Cold storage 11
Fumigation 11
Miscellaneous control measures 12

FARMERS' BULLETIN NO. 1347.—STANDARD VARIETIES OF CHICKENS:
I. THE AMERICAN CLASS: Page
The kind of chicken the farmer wants 1
Characteristics of the general-purpose breeds 1
Breeds and varieties 3
The Plymouth Rock 3
The Wyandotte 9
The Java 11
The Dominique 12
The Rhode Island Red 13
The Rhode Island White 15
The Buckeye 15
The Jersey Black Giant 16
The Chantecler 18
FARMERS' BULLETIN NO. 1348.—THE CORRUGATION METHOD OF IRRIGATION:
Introduction 1
Field ditches 3
Structures 5
Corrugations 15
Making the corrugations 17
Wasteways 21
Use of water in the corrugation method 21
Utility of the corrugation method 22
Limitations on adaptability of the corrugation method 23
FARMERS' BULLETIN NO. 1349.—INCREASING THE POTATO CROP BY SPRAYING:
The Colorado potato beetle 1
Blister beetles 7
Flea beetles 8
Cutworms 10
The potato leafhopper 10
Aphids or plant lice 12
Late blight and rot 13
Other diseases 16
Combined treatment for diseases and insects 18
Value of spraying 18
Spraying appliances 19
How to prepare Bordeaux mixture 21
FARMERS' BULLETIN NO. 1350.—BEEF-CATTLE BARNS:
Type of barn 1
Location of the barn 1
Size of the barn 2
Arrangement is important 3
The feed lot 4
Barn ventilation 6
Construction of the barn 11
Barn designs 11
General-purpose barn 11
Cattle-feeding barns 12
Cattle sheds 14
Barn for breeding herd 15
